

# Another Sky Climber Reference!

## Grand Lisboa, Sé – Macau

- DIVISION:** Sky Climber Europe
- PROJECT NAME:** Grand Lisboa Casino & Hotel, Macau
- APPLICATION:** Gantries for external maintenance of dome

The Grand Lisboa is a 47-floor (261m) Casino and Hotel in Macau. The Grand Lisboa is the tallest building in Macau and the most distinctive part of its skyline. It offers 800 gaming tables and 1000 slot machines and the hotel has 403 rooms and suites.

A key attraction of the Grand Lisboa is the 3-star rated Michelin restaurant “Robuchon au Dôme”. This world-famous restaurant is located in the dome on top of the building.

The owners of the Grand Lisboa approached Sky Climber to redesign, improve and replace the existing gantries on the dome of the “Robuchon au Dôme”.

Sky Climber designed and manufactured 2 gantries (6.5m and 11.0m), which can be connected with a landing to allow workers to pass from one gantry to the other in order to cover the entire height of the dome.

The gantries are made out of gold coloured anodized lightweight aluminium and equipped with all required safety devices as per European Norms. From the gantries, the workers have full access to the skylight for all maintenance and repair jobs.

<b>Type of Platform</b>	<b>Lightweight Aluminium Sky Climber Gantry</b>
<b>Motorization</b>	<b>Sky Climber Gantry Trolleys, Manually Operated</b>
<b>Safety Devices</b>	<b>Limit and Ultimate Limit Switches, lifelines, storm locks</b>
