

**SKY CLIMBER News: February 2014**

**SC-134 Monorail Turntable**

SKY CLIMBER® has developed a manual turntable allowing to switch the monorail trolley to different monorail tracks. This turntable is easy to mount and to operate and with the possibility to change the angle every 15 degrees from 30° up to 150° (Only applicable with underhanging trolleys). It will provide you a flexible solution on complex buildings where a combination of monorail tracks is used. The turntable can be painted or powder coated in any desired color.
