Another Sky Climber Reference!

Le Mirage City Walk – Marriott Executive Apartments, Doha - QATAR

- DIVISION:** Sky Climber BMU & PI Division
- PROJECT NAME:** Le Mirage City Walk – Marriott Executive Apartments
- APPLICATION:** Building Maintenance Unit (BMU)

Le Mirage City Walk is a 400-room Marriott Executive Apartments Hotel. Located in the Bin Mahmoud District in the hearth pf downtown Doha’s Central Business District, Le Mirage City Walk provides sweeping views of Doha whilst providing residents with access to a wide range of fashion boutiques, high end restaurants and head offices of most important companies represented in Qatar.

Le Mirage City Walks’ façade access solution consists of 2 identical permanently installed telescopic Sky Climber BMUs.

The BMUs are installed one on each 15-storey tower. The BMUs are on a dedicated 17m long steel at the roof level to access track and do have a telescopic jib which can extend up to 30m length in order to cover all façades of the entire building complex.

The BMU fully complies with European Norm EN1808 and is therefore fitted with a restraint system and a computerised stop system to pause the cradle at the selected height.

Vertical run	60m
Self-weight	34 tonnes
Type of Jib	Telescopic jib of 30m length, slewing, rotating
Type of Mast	Fixed
Length cradle	2m
Cradle rated load	240Kg
Hoisting	Multilayer drum
Norms	European Norm EN1808
